CEO's Message

UPHOLDING THE HSL COMMITMENT TO SAFETY

Workplace fatalities in Singapore rose from 30 in 2020 to 37 last year. Between January 1 and June 22 this year, there were 27 workplace fatalities, many of which could have been prevented with basic safety and health measures. This upward trend has caused the Singapore government to step up enforcement, almost doubling inspections and issuing harsher penalties for poor Safety management and outcomes^{1,2}.

As a responsible company, it is our duty to keep all our workers safe so that they can return home safely to their families. Being part of the Construction industry means that the nature of our jobs is physically and mentally demanding. A mistake or irresponsible action by anyone can lead to serious injury or even death. Lapses in Workplace Safety and Health (WSH) are unacceptable because lives are at stake.

In conjunction with the national safety time-out³, HSL held its Safety Week from 17 to 27 May 2022 across various project sites. This year's theme focuses on Mental Health & Well-Being. You may refer to our <u>Special Edition</u> Safety Newsletter for more details.

I am pleased to share that our Safety team has done a fantastic job in keeping everyone safe. To date, we have clocked over 11 million safe man-hours. Last year, we clocked close to 2.8 million safe man-hours. We have zero accidents reported so far this year.

However, Safety is everyone's responsibility. Many accidents are preventable if we are mentally alert at all times, and help to look out for one another. Performing work activities that are routine and repetitive does not guarantee that accidents will not happen. All employees must take WSH seriously and personally, and implement WSH measures before an accident occurs.

I would like to express my gratitude to the HR, Safety, Project and Management Teams for making HSL Safety Week a fun, enriching and meaningful event. I am also grateful for your efforts and commitment to protect our safe work culture, and I look forward to growing stronger together.

BUILDING A HIGHER-SKILLED WORKFORCE

For over two years, the pandemic caused lockdowns and disruptions to the way we live and work. As a result of tightening border measures and more stringent foreign labour controls, HSL faced increasing manpower shortage even as we strived to meet operational targets and deadlines. Today, as Singapore transitions to living with Covid-19, and with our economy reopening and activities ramping up, HSL has focused its efforts in bringing in more workers to meet operational needs. Since Q4 2021, we have successfully introduced over 200 new and returning workers to our workforce.

We have a new challenge now which is to bring our new workforce up to speed. To this end, we have streamlined a training curriculum for our new workers. We are relooking at our safety training processes such as the daily toolbox meeting, and making a concerted effort to inform and educate our workers from their very first day. By doing live demonstrations of the day's activities and going through each process step-by-step, we can equip our workers with the right knowledge and tools of how to do their job better, understand the hazards and risks involved in each role, and the importance of working together to keep each other safe.

To build a better workforce, training on the proper use of equipment and work processes is important. With higher awareness, the quality of work increases, productivity improves, and the work gets done with high efficiency and in a safer manner.

It is my wish that the people of HSL will remain resilient, work together and help one another stay safe and healthy so that the organisation continues to thrive for many better years ahead.

- Charles Quek

HSE Sharing

Changi Water Reclamation Plant Phase 2 (C22B)

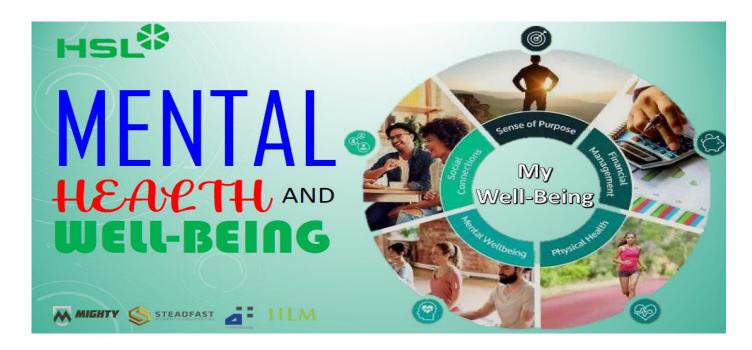

Owner : Public Utilities Board (PUB)

Main Contractor : HSL Constructor Pte Ltd

Start Date : Dec 2016

End Date : Sept 2022

HSL Safety Day 2022

HSL Safety Day 2022 was successfully executed, supported by clients, HSL management and C22B workforce. This year's theme focuses on Mental Health & Well-Being. With the COVID-19 pandemic, mental well-being becomes even more affected as a result of a shift in work patterns, lack of social support, and difficulty in balancing work life. We encourage our employees to reach out to their respective supervisors and site managers for support at work, whenever required. Well-supported employees have better mental well-being, and are more likely to be engaged and productive at work. This in turn contributes to a stronger organization and better business outcomes.

03. HSE Sharing: C22B Project

Environmental

Scheduled environmental control from pest control operator and inhouse on site to prevent infestation

HSL Top Management Walkabout

Site visit from HSL top management on site

Exemplary Site Practices

Distribution of HPB health booklet to create health awareness

Water parade was conducted daily to beat the heat stress during humid weather

Daily morning exercise was conducted to Pre entry inspection on machinery to ensure improve focus and cognition before entering site compliance prior to enter worksite site

05. HSE Sharing: C22B Project 06. HSE Sharing: C22B Project

HSE Sharing

Improvement to Bedok Canal C2

Owner : Public Utilities Board (PUB)

Main Contractor : HSL Constructor Pte Ltd

Start Date : Nov 2015

End Date : End 2022

Exemplary Site Practices

Life vest donned and lifebuoy provided with towboard in place

Signages to warn public of works ongoing at the PCN

Successes:

- Successful handover of the PCN and Parks and Playground
- Traffic management well managed

Challenges:

- Whenever there is high tide in canal, workers are unable to work, therefore workers are sometimes seen idling on cantilever slab
- Dust control during dry weather period remains a challenge

Photos Throughout the Project

Skin wall rectification

Cleaning of PCN Surface before handing over

Installation of lamppost for PCN

Accomplishments

- Safe Manhours: 1,973,679 hrs (as of 31st May 2022)
- NEA feedbacked during the site visit to continue our positive efforts against mosquito breeding and noise feedback by residents

Nitrile Butadiene Latex Project - Civil & Building

Owner : LG & Petronas Chemical

Main Contractor : DL Engineering & Construction Malaysia Sdn Bhd

Start Date : 18 May 2021

Fnd Date : 31 Oct 2022

Overall NBL project site

Nitrile Butadiene Latex (NBL) Project is the second project for HSL Constructor Sdn Bhd, Malaysia to be executed and constructed in an operating life refinery plant condition. After a year of working with various rules and SOPs from the government and client, we managed to achieve our first HSE milestone – 150,000 man – hours without LTI.

150,000 Safe Man-Hours Milestone Celebration

Best HSE Award

Speech by LGPC HSE

On 16 Dec 2021, HSL celebrated the first HSE milestone achievement for 150K safe man-hours without LTI. The event was attended by LG & Petronas Chemical (LGPC) HSE team and DL Engineering & Construction Malaysia Sdn Bhd (DL) management team. The session started with an opening speech by the project manager and LGPC/DLENC HSE officer.

Certificates were presented by HSL management to the deserving workers with the best working attitude and HSE performance.

1 Million Safe Man-Hours Milestone Celebration

Group photo to commemorate celebration Speech by Petronas Lead

On 4 April 2022, DL HSE team celebrated the milestone achievement for 1 Million safe man-hours without LTI. The session started with an opening speech by PGPC CEO and Petronas HSE.

Certificates were presented by the top management to the deserving workers with the best working attitude and HSE performance.

HSL Abroad

Bintulu Methanol Plant Project - 1

Owner : Sarawak Economic Development Corporation (SEDC) Petchem Hub

Client : China Communication Construction Company (M) Sdn Bhd

Al's scope of work : Marine Test Piles

Work Duration : 3 Months

Project Status : In Progress

Malaysia faces two monsoon wind seasons every year. They are the Southwest Monsoon from late May to September, and Northeast Monsoon from October to March. Normally, Northeast Monsoon brings in stronger wind and swell, as well as more rainfall compared to Southwest Monsoon.

Bintulu Methanol Plant Project is located at the open sea area near to South China Sea. SGP 3 entered Bintulu sea end-August 2021 with 10 technicians onboard. Upon arrival, SGP 3 and her technicians were quarantined for 14 days as per requirement from local authorities. Our technicians were also required to receive their vaccinations before we could enter the project site. After arranging for the first vaccination, SGP 3 and the technicians managed to enter the project site. However, they faced Northeast Monsoon from October to December. During monsoon season, SGP 3 faced high swell and strong waves onsite. During the night, condition of the waves and swells were worse compared to daytime, causing the anchoring wire of SGP 3 to break a few times at night during monsoon season. Anchor tug and tug boat were sent to assist SGP 3 on wire reconnecting. After discussion with our client, we came to an agreement that they will provide tug boat and anchor tug to assist in towing SGP 3 to shelter during monsoon period.

First project construction pile driven by SGP 3 at Bintulu Methanol Project

Platform installation for test pile

HSL Abroad

Sepangar Bay Oil Terminal Project -1

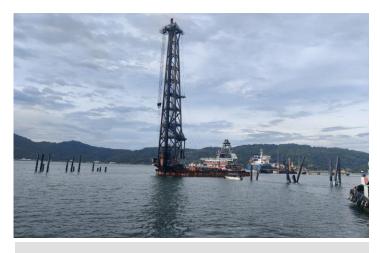

Owner : Sabah Ports Sdn Bhd

Client : China Harbour Engineering Company Construction (M) Sdn Bhd

Al's scope of work : Installation of 183 nos of Steel Pipe Piles

Work Duration : 3 Months

Project Status : In Progress

Positioning for SGP 3 for piling work

To keep ourselves protected from the high COVID-19 infection rate, all our SGP 3 technicians are fully vaccinated and we follow stringent standard operating procedures diligently.

Limited site working areas are available due to the operating jetty next to the project site. Thus, SGP 3 anchoring system is affected. Currently, 119 nos of piles with 610mm diameters have been driven and all are in tolerance pile eccentricity check and approved by client with flying colours.

Positioning SGP 3 and material barge without anchor tug is another challenge that was being faced in SBOT Project. Instead, 2 tug boats and 1 crane barge were used for anchoring and positioning of SGP 3 which inevitably caused some delay. SGP 3 needs to coordinate precisely with client to minimize the delay. Communication is key for the successful operation during this harsh period.

HSL Abroad

Construction of Seawall for Patimban Port Package 2, Subang, West Java

Owner : Directorate General of Sea Transportation of Republic Indonesia

Main Contractor : Toyo - Adhi - Wakachiku Joint Operation

Scope : Piling Works, Precast Fabrication Works,

Precast Installation Works

Project Status : Completed (November 2021)

Patimban Project is an infrastructure project developed by the Indonesian and Japanese governments through JICA. Despite difficulties due to the Covid-19 pandemic such as increased safety and quarantine measures in place, we had safely completed the project and were awarded 'HSE Excellent Contributor Award' with Zero Accident by our main contractor.

HSL Abroad

Jetty Terminal Khusus Kobexindo, Kutai

Owner : PT. Kobexindo Semen and PT. Hongshi

HSL**
INDONESIA

Main Contractor : CSCEC

Location : Kutai, East Kalimantan

Scope : Piling Works

Status : In Progress

East Kutai is located in the special economic zone of East Kalimantan, which has a focus on developing Industrial Areas and International Ports. PT. Kobexindo Semen and PT. Hongshi are currently collaborating in the construction of the Largest Cement Plant in Indonesia with a production capacity of up to 10 million tons of cement per year. With no doubt, the piling works of 500nos of piles by HSL will become the foundation of success for Kobexindo Special Jetty Terminal Project.

In strong spirits to do our 'bread and butter' Piling Work safely, our SGP6 team who had successfully completed Morowali Project in March 2022 shall carry the same commitment to complete the Kutai Project with same attitude, that is to compete the project with Zero Accident

P029-Duckbill Valve Replacement Work

Client : Public Utilities Board

Main Contractor : Steadfast Engineering & Construction Pte Ltd

Start Date : July 2021

End Date : Nov 2021

Steadfast conducted the underwater dredging using airlift method. Stones (maximum 4inch) were to be removed by airlift method.

External spuds were used for deep sea barge parking instead of anchorage. Its reduced barge shifted timing & avoided anchorage failures during rough sea.

Guide Bullets were used for underwater duckbill installation to prevent existing duckbill thread from being damaged during installation.

Supervisory Training

As part of the continuous development philosophy, Mighty conducted the supervisory enhancement training to equip each and every supervisor with the right skills and mindset. In whole, this series of 6 carefully crafted trainings seek to provide the opportunity to learn new knowledge, unlearn bad habits as well as re-learn old wisdom.

Feedback from supervisors on pain-points and issues at worksite are gathered, and future trainings will serve as a discussion platform to overcome challenges and achieve better outcomes onsite.

HSE Sharing Pfizer API Project, C04- Sub-Structure Works

Pfizer team celebrated 3 Million Safe Man-Hours on 13th May 2022

One of the first thing that a person notices when he or she step into the Pfizer site is the way construction works are carried out. From digital turnstiles, well demarcated barricade system, banners of workforce commitment to safety, signs of safety achievements, to the way listening tours are conducted to understand ground sentiments; they all convey the level of commitment that Client Pfizer and Main Contractor Exyte have towards an Incident Free Workplace (IFW).

Mighty's involvement in the civil substructure package for the Pfizer Expansion Project has seen works being expedited on all fronts; day and night. Being fast-tracked which is the norm for pharmaceutical facilities projects, the pace of construction demands close communication between stakeholders and constant planning to keep up with the development onsite.

The Incident Free Workplace (IFW) initiative illustrates the concept that safety is a pre-condition – akin to breathing, in which all mankind cannot do much else if we do not remember to breathe frequently – instead of being a priority, which means there is a choice to make. Safety shall always be in place from the onset to steer organizational behaviours.

During the celebration of the 3 Million Safe Manhours Celebration, Mighty was commended as the Top 5 Contractors for the safety performance in May 2022. Embarking on the IFW journey has certainly brought new insights to the team and undoubtedly steer the way safety is being commandeered for future projects.

VOL 1 | ISSUE 10 | JAN - JUN 2022 ________

Top 5 Contractors in Pfizer Expansion Project

Incident-free Workplace Recognition

Management Site Walk

Management site walks emphasize the importance of interpersonal contact, open appreciation and recognition. It is one of the most important ways to build civility and performance in the workplace.

Management Site Walk at A+, PCS on 2nd March 2022

A+ Emergency Drill

Emergency drills are essential for every business. **Practice makes perfect** – experience gained through emergency drills is very important. It gives us the understanding on what to do in case of a real emergency. We should ensure that everyone knows the emergency evacuation procedure to prepare for a real scenario.

Walking to assembly area in an orderly manner

Headcount & Briefing at assembly area

Safety Promotion

The staff received umbrella & water bottle from PCCA/PCS as reward for achievement of 50 million man-hours without LTI

PCS employees and contractor have jointly achieved a combined 50 million hours worked without lost time injury as of January 2022. This achievement is amidst the unprecedented Covid-19 pandemic situation and shutdown maintenance in 2021.

Safety Day 2022

PCS A+ team celebrated Safety Day on 18th May 2022 with the theme centered on Mental Health & Well Being
